WELCOME TO THE OPEN SOURCE PROJECT MOX.EDUCATION

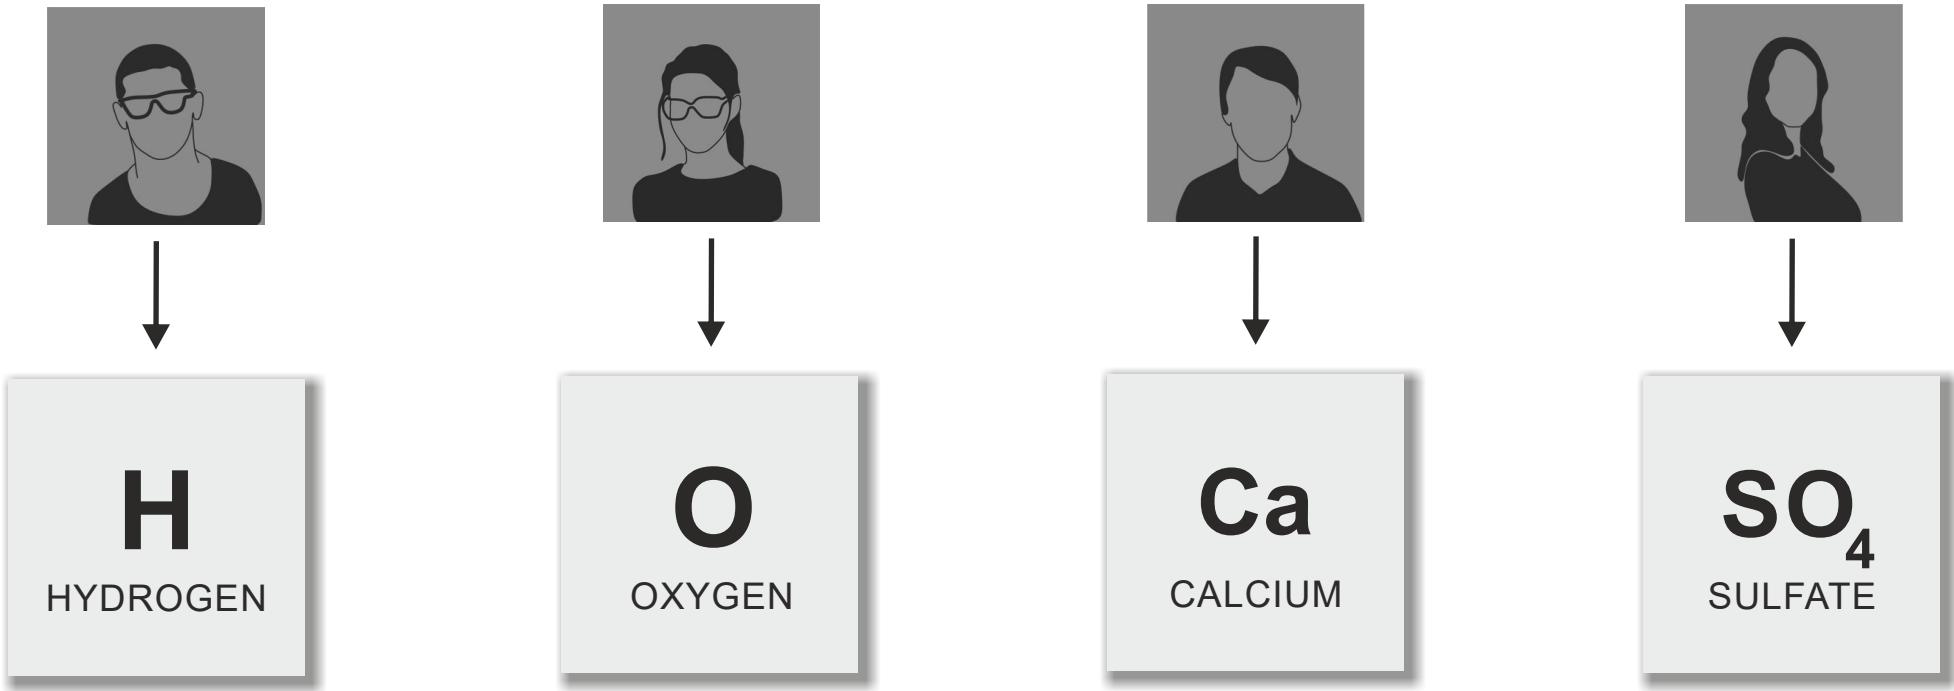

**WIKIPEDIA HAS BEEN A GREAT PROJECT
BUT NOW IS TIME TO WORK ON THE NEXT GENERATION
THE DIGITAL ONLINE LIBRARY OF THE FUTURE**

IN THE NEXT PAGES I WILL TRY TO EXPLAIN THE CONCEPT

THANK YOU FOR BUILDING THE FUTURE WITH ME

GEORGE PAPA

K-Card

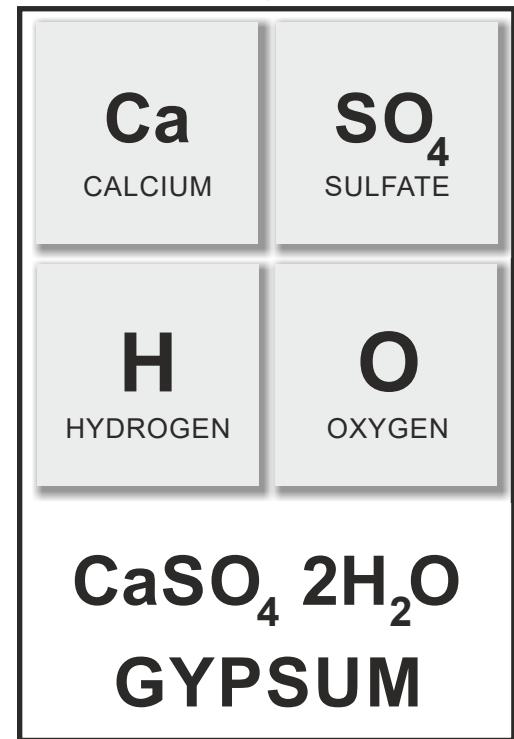

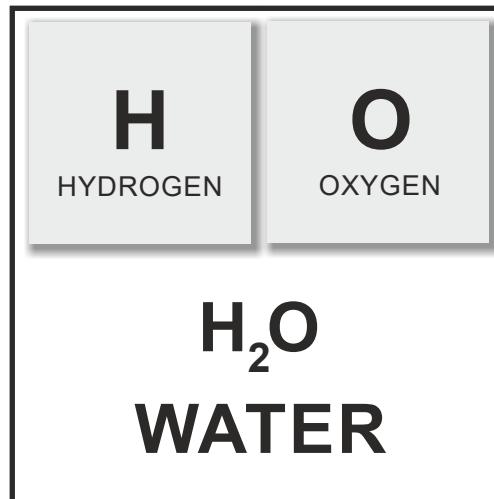

Every person has knowledge in some form or another. But how do we connect the knowledge in such a way that we can use it to solve complex problems or learn super fast?

The concept is that we break knowledge in the simplest form of information. For example: H stands for Hydrogen. I call this simplest knowledge unit:

Knowledge Card or short: K-Card

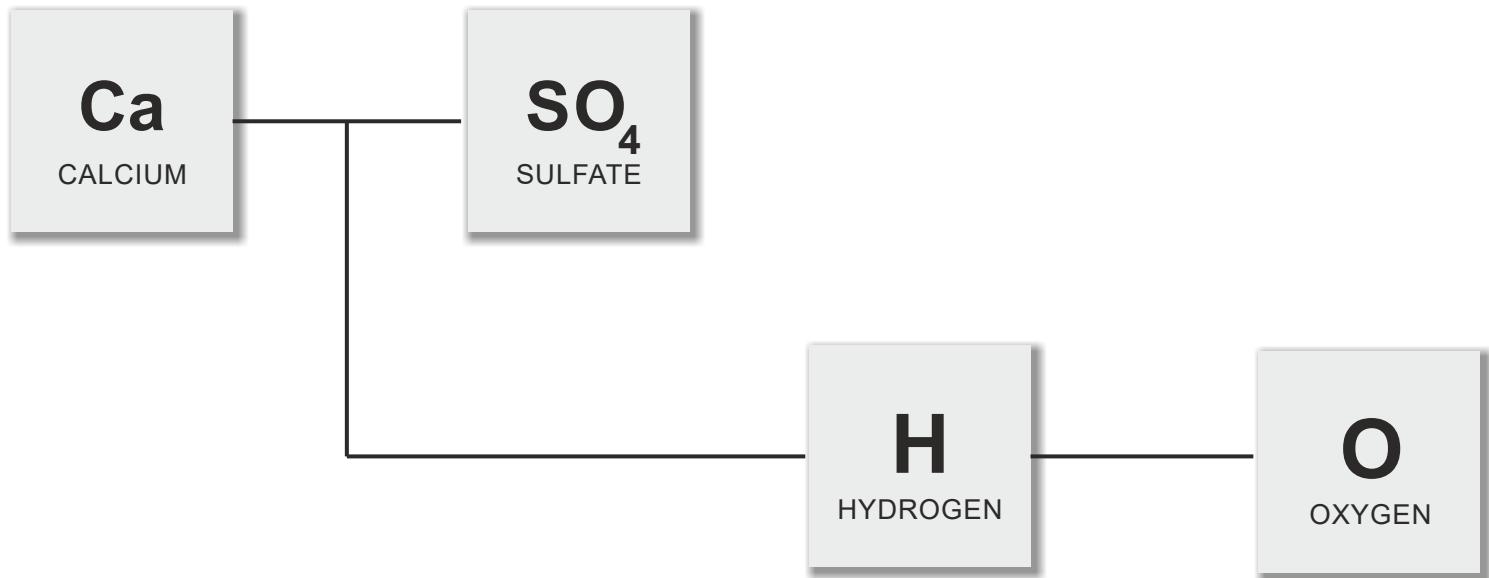

K-Block

You or other people who know more can take these Information Cards and put them together in a logical form to create Knowledge. This new unit I call it

Knowledge Block or short: K-Block

K-Map

All the Icards in a Kblock have to have a certain logic behind, a system on how they relate to each other.
This function I call it

Knowledge Map or short: K-Map

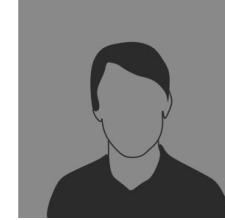

K-Card

SAND

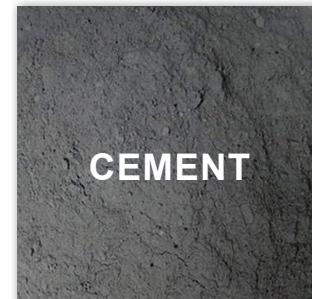

GRAVEL

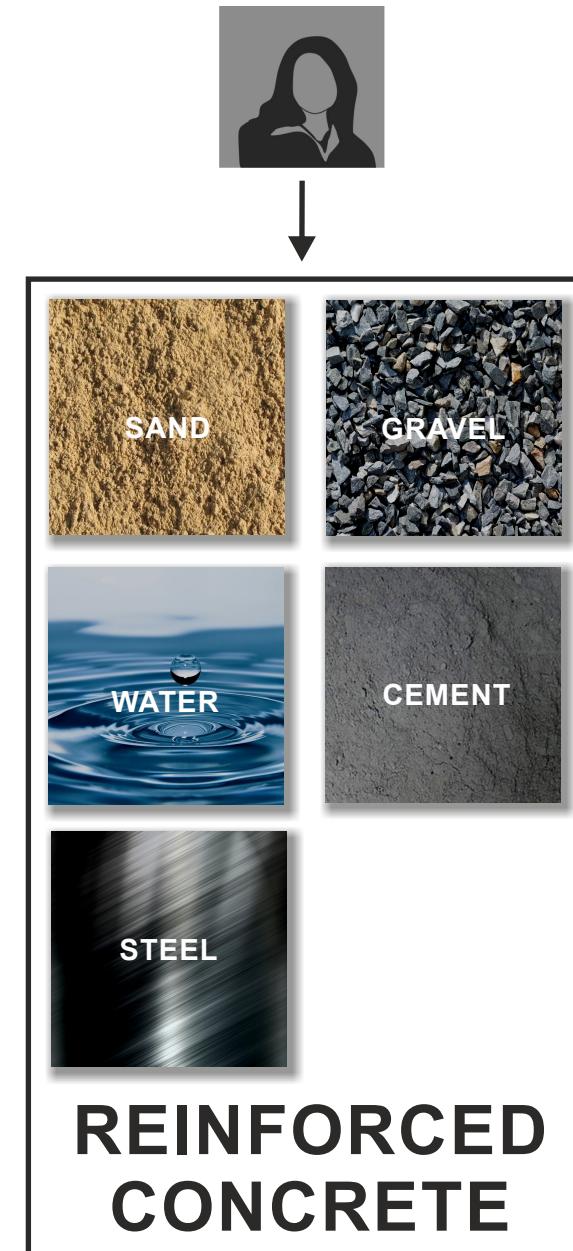

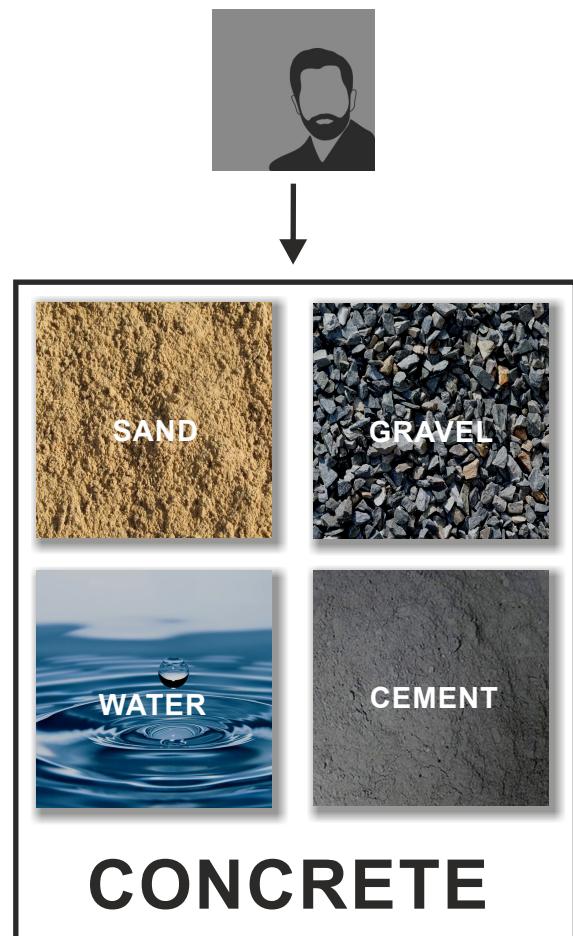

WATER

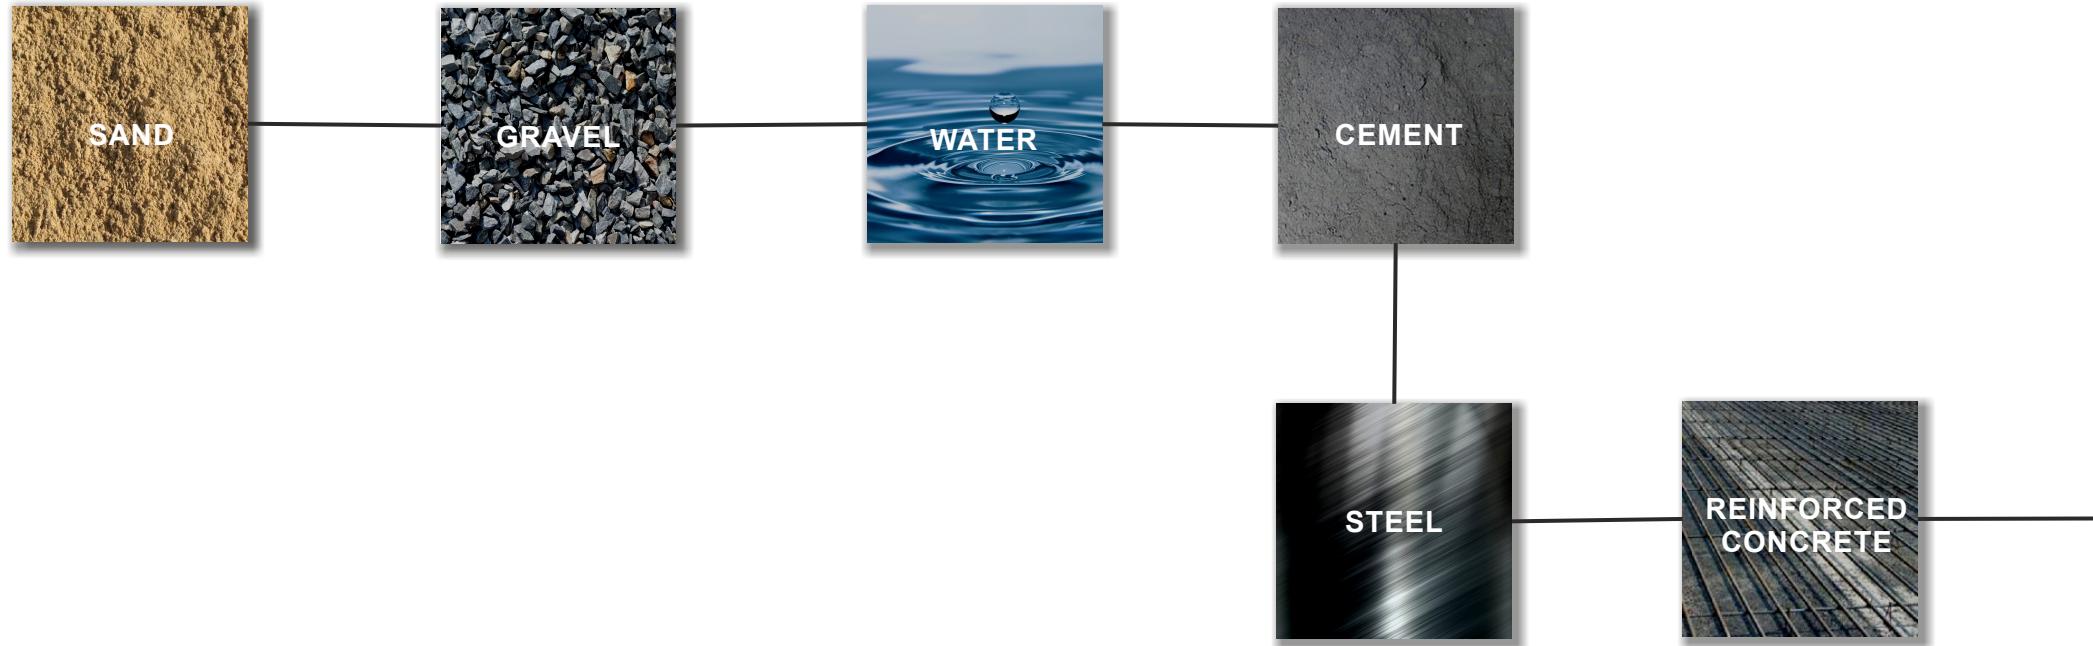

CEMENT
